Cylindrical Proximity Sensor
E2A

High quality for extra long life in daily use
• wide portfolio range through modular concept
• designed and tested for extra long life
• IP67 and IP69k for highest protection in wet environments
• continuously high quality level through specialized manufacturing process
• DC 3-wire and DC 2-wire models
• Normally open (NO), normally closed (NC) and antivalent (NO+NC) models
• up to 30mm sensing distance
• Stainless steel and brass housings
• Pre-wired versions with different cable materials and diameters, M8 and M12 connector types, pre-wired types with cable end connectors

*1. Material specifications for stainless steel housing case: 1.4305 (W.-No.), SUS 303 (AISI), 2346 (SS). Please contact your OMRON representative for other stainless steel materials.
*2. Please contact your OMRON representative for DC 2-wire models.
*3. Stainless steel models are also available. Please contact your OMRON representative.

Note: M30 non-shielded Models with double sensing distance and short barrels cannot be mounted due to the necessary separation distance from the surrounding metal. Standard sensing models are thus available.
Connectivity

The E2A sensors are available with the following connectors and cable materials:

**Pre-wired models**

- Standard cable lengths are 2m and 5m.
- For other cable lengths please contact your OMRON representative.

**Standard cable material:** PVC (dia 4mm) -WP

**Other available cable materials and sizes:**
- PVC (dia 6mm) -WS
- PUR/PVC – PUR jacket (dia 4mm) -WA
- PUR/PVC – PUR jacket (dia 6mm) -WB
- PVC robotic cable (dia 4mm) -WR

**Pre-wired models with cable end connectors**

- All pre-wired models can be fitted with cable and connectors.

**Standard cable end connectors:**
- M12 M1J
- M8 (4 pin) M3J
- M8 (3 pin) M5J

**Other cable end connectors are available on request.**

**Connector models**

- Standard connectors: M12, M8 (4 or 3 pin) -M1, -M3, -M5
## Model Number Legend

### Example:
- **E2A-M12LS04-M1-B1** Standard, M12, long barrel, shielded, Sn=4 mm, M12 connector, PNP-NO
- **E2A-S08KN04-WP-B1 5M** Standard, M8 stainless steel, short barrel, non-shielded, Sn=4 mm, pre-wired PVC cable, PNP-NO, cable length=5 m

Sensing distance
- 2 mm ± 10% 4 mm ± 10% 4 mm ± 10% 8 mm ± 10%
Setting distance
- 0 to 1.6 mm 0 to 3.2 mm 0 to 3.2 mm 0 to 6.4 mm
Differential travel
- 10% max. of sensing distance
Target
- Ferrous metal (The sensing distance decreases with non-ferrous metal.)

Standard target (mild steel ST37)
- 8x8x1 mm 12x12x1 mm 12x12x1 mm 24x24x1 mm
Response frequency (See note 1.)
- 1,500 Hz 1,000 Hz 1,000 Hz 800 Hz

Power supply voltage
- (operating voltage range) 10 to 32 VDC, (10 to 32 VDC)
Current consumption (DC 3-wire)
- 10 mA max.
Output type
- -B models: PNP open collector
- -C models: NPN open collector

Control output
- Load current (See note 2.) 200 mA max. (32 VDC max.)
- Residual voltage 2 V max. (under load current of 200 mA with cable length of 2 m)
Indicator
- Operation indicator (Yellow LED)
Operation mode
- (with sensing object approaching) -B1/-C1 models: NO
- -B2/-C2 models: NC
- -B3/-C3 models: NO+NC
- For details, refer to the timing charts. (See note 4.)
Protection circuit
- Power source circuit reverse polarity protection, Surge suppressor, Short-circuit protection
- Output reverse polarity protection, Power source circuit reverse polarity protection, Surge suppressor, Short-circuit protection
Ambient air temperature
- Operating: -40°C to 70°C, Storage: -40°C to 85°C (with no icing or condensation)
Temperature influence (See note 2.)
- ±10% max. of sensing distance at 23°C within temperature range of -25°C to 70°C
- ±15% max. of sensing distance at 23°C within temperature range of -40°C to 70°C
Ambient humidity
- Operating: 35% to 95%, Storage: 35% to 95%

Voltage influence
- ±1% max. of sensing distance in rated voltage range ±15%
Insulation resistance
- 50 MΩ min. (at 500 VDC) between current carry parts and case
Dielectric strength
- 1,000 VAC at 50/60 Hz for 1 min between current carry parts and case
Vibration resistance
- 10 to 55 Hz, 1.5-mm double amplitude for 2 hours each in X, Y and Z directions
Shock resistance
- 500 m/s², 10 times each in X, Y and Z directions 1,000 m/s², 10 times each in X, Y and Z directions

Standard and listings (See note 3.)
- IP67 after IEC 60529
- IP69k after DIN 40050
- EMC after EN60947-5-2
Connection method
- Pre-wired models (standard is dia 4mm PVC cable with length = 2m).
- Please see chapter ‘Connectivity’ for details on different cable materials and lengths and M8 or M12 connectors.

Weight (packaged)
- Pre-wired model Approx. 65 g Approx. 85 g
- Connector model M12 connector models: Approx. 20 g M8 connector models: Approx. 15 g Approx. 35 g
Material
- Case Stainless steel Brass-nickel plated or stainless steel
- Sensing surface PBT
- Cable Standard cable is PVC dia 4mm.
- For other cable materials or diameters please refer to chapter ‘Connectivity’
- Clamping nut Brass-nickel plated Brass-nickel plated for brass models stainless steel for steel models

Note 1. The response frequency is an average value. Measurement conditions are as follows: standard target, a distance of twice the standard target distance between targets, and a setting distance of half the sensing distance.
2. When using any model at an ambient temperature between -40°C and -25°C and a power voltage between 30 and 32 VDC, use a load current of 100 mA max.
3. For USA and Canada: use class 2 circuit only.
4. -B3/-C3 NO+NC models are available in M12, M18 and M30 housings with M12 connectors, pre-wired and with cable end connectors.

#### Target
- Ferrous metal (The sensing distance decreases with non-ferrous metal.)
- Standard target (mild steel ST37) 24×24×1 mm
- Response frequency (See note 1.) 500 Hz
- Power supply voltage (operating voltage range) 12 to 24 VDC. Ripple (p-p): 10% max.
- Current consumption (DC 3-wire) 10 mA max.
- Output type -B models: PNP open collector
- -C models: NPN open collector

#### Operation mode (with sensing object approaching)
- -B1/-C1 models: NO
- -B2/-C2 models: NC
- -B3/-C3 models: NO+NC

#### Protection circuit
- Output reverse polarity protection
- Power source circuit reverse polarity protection
- Surge suppressor
- Short-circuit protection

#### Ambience air temperature
- Operating: -40°C to 70°C, Storage: -40°C to 85°C (with no icing or condensation)
- Temperature influence (See note 2.) ±10% max. of sensing distance at 23°C within temperature range of -25°C to 70°C
- ±15% max. of sensing distance at 23°C within temperature range of -40°C to 70°C

#### Ambient humidity
- Operating: 35% to 95%, Storage: 35% to 95%

#### Voltage influence
- ±1% max. of sensing distance in rated voltage range ±15%

#### Insulation resistance
- 50 MΩ min. (at 500 VDC) between current carry parts and case

#### Dielectric strength
- 1,000 VAC at 50/60 Hz for 1 min between current carry parts and case

#### Vibration resistance
- 10 to 55 Hz, 1.5-mm double amplitude for 2 hours each in X, Y and Z directions

#### Shock resistance
- 1,000 m/s², 10 times each in X, Y and Z directions

#### Standard and listings (See note 3.)
- IP67 after IEC 60529
- IP69K after DIN 40050
- EMC after EN60947-5-2

#### Connection method
- Pre-wired models (standard is dia 4mm PVC cable with length = 2m).
- Please see chapter 'Connectivity' for details on different cable materials and lengths and M8 or M12 connectors.

#### Weight (packaged)
- Pre-wired model: Approx. 160 g
- Connector model: Approx. 70 g
- Cable: Standard cable is PVC dia 4mm. For other cable materials or diameters please refer to chapter 'Connectivity'

#### Material
- Case: Brass-nickel plated or stainless steel
- Sensing surface: PBT
- Clamping nut: brass-nickel plated for brass models stainless steel for steel models

### Notes
1. The response frequency is an average value. Measurement conditions are as follows: standard target, a distance of twice the standard target distance between targets, and a setting distance of half the sensing distance.
2. When using any model at an ambient temperature between -40°C and -25°C and a power voltage between 30 and 32 VDC, use a load current of 100 mA max.
3. For USA and Canada: use class 2 circuit only.

- **Differential travel**: 10% max. of sensing distance
- **Target**: Ferrous metal. (The sensing distance decreases with non-ferrous metal.)
- **Standard target**: 24x24x1 mm  
  48x48x1 mm  
  45x45x1 mm  
  Short body: 60x60x1 mm  
  Long body: 90x90x1 mm
- **Response frequency (See note 1.)**: 500 Hz  
  400 Hz  
  250 Hz  
  100 Hz
- **Power supply voltage (operating voltage range)**: 12 to 24 VDC; Ripple (p-p): 10% max.  
  (10 to 32 VDC)
- **Leakage current**: 0.8 mA max.
- **Output type**: DC 2 wire type
- **Control output**
  - **Load current**: 3 to 100 mA
  - **Residual voltage**: 3 V max. (under load current of 100 mA with cable length of 2 m)
- **Indicator (see timing chart)**: NO type: Operation indicator (Yellow), Setting indicator (Red)  
  NC type: Operation indicator (Yellow)
- **Operation mode**: -D1 models: NO  
  -D2 models: NC
- **Protection circuit**: Surget suppressor, Short circuit protection
- **Ambient temperature**
  - Operating: -40°C to 70°C  
  - Storage: -40°C to 85°C (with no icing or condensation)
- **Temperature influence**: ±10% max. of sensing distance at 23°C within temperature range of -25°C to 70°C  
  ±15% max. of sensing distance at 23°C within temperature range of -40°C to 70°C
- **Ambient humidity**
  - Operating: 35% to 95%  
  - Storage: 35% to 95%
- **Voltage influence**: ±1% max. of sensing distance in rated voltage range ±15%
- **Insulation resistance**: 50 MΩ min. (at 500 VDC) between current carry parts and case
- **Dielectric strength**: 1,000 VAC at 50/60 Hz for 1 min between current carry parts and case
- **Vibration resistance**: 10 to 55 Hz, 1.5-mm double amplitude for 2 hours each in X, Y, and Z directions
- **Shock resistance**: 500 m/s², 10 times each in X, Y, and Z directions
- **Standard and listings (See note 3.)**: IP67 after IEC 60529  
  IP69K after DIN 40050  
  EMC after EN60947-5-2
- **Connection method**: Pre-wired models (standard is dia 4mm PVC cable with length = 2m)
  Please see chapter ‘Connectivity’ for details on different cable materials and lengths and M8 or M12 connectors.
- **Weight (packaged)**
  - **Pre-wired model**: Approx. 160 g  
    Approx. 280 g  
    short body: 280 g  
    long body: 370 g
  - **Connector model**: Approx. 70 g  
    Approx. 200 g  
    short body: 200 g  
    long body: 260 g
- **Material**
  - **Case**: Brass-nickel plated or stainless steel
  - **Sensing surface**: PBT
  - **Cable**: Standard cable is PVC dia 4mm.  
    For other cable materials or diameters please refer to chapter ‘Connectivity’
  - **Clamping nut**: brass-nickel plated for brass models stainless steel for steel models

**Note 1.** The response frequency is an average value. Measurement conditions are as follows: standard target, a distance of twice the standard target distance between targets, and a setting distance of half the sensing distance.

**Note 2.** When using any model at an ambient temperature between -40°C and -25°C and a power voltage between 30 and 32 VDC, use a load current of 50 mA max.

**Note 3.** For USA and Canada: use class 2 circuit only.

Two, clamping nuts

Note: Operation indicator (yellow LED, 4×90°)

Note: Please contact your OMRON sales representative for dimension drawings not listed here.
Precautions

Safety Precautions

Power Supply
Do not impose an excessive voltage on the E2A, otherwise it may be damaged. Do not impose AC current (100 to 240 VAC) on any DC model, otherwise it may be damaged.

Load Short-circuit
Do not short-circuit the load, or the E2A may be damaged.

The E2A's short-circuit protection function will be valid if the polarity of the supply voltage imposed is correct and within the rated voltage range.

Correct Use

Designing

Power Reset Time
The Proximity Sensor is ready to operate within 100 ms (160ms for NO+NC -B3 / -C3 types) after power is supplied. If power supplies are connected to the Proximity Sensor and load respectively, be sure to supply power to the Proximity Sensor before supplying power to the load.

Effects of Surrounding Metal
When mounting the E2A within a metal panel, ensure that the clearances given in the following table are maintained.

<table>

Note 1. In the case of using the supplied nuts.
If true flash mounting is necessary, apply a free zone of 1.5 mm.

2. In the case of using the supplied nuts.
If true flash mounting is necessary, apply a free zone of 4 mm.

Wiring

Do not expose the product to flammable or explosive gases.

Do not disassemble, repair, or modify the product.

Power OFF
The Proximity Sensor may output a pulse signal when it is turned OFF. Therefore, it is recommended that the load be turned OFF before turning OFF the Proximity Sensor.

Power Supply Transformer
When using a DC power supply, make sure that the DC power supply has an insulated transformer. Do not use a DC power supply with an auto-transformer.

Mutual Interference
When installing two or more Sensors face-to-face or side-by-side, ensure that the minimum distances given in the following table are maintained.

(Unit: mm)
Wiring

High-tension Lines
Wiring through Metal Conduit:
If there is a power or high-tension line near the cable of the Proximity Sensor, wire the cable through an independent metal conduit to prevent against Proximity Sensor damage or malfunctioning.

Cable Extension
Standard cable length is less than 200 m.
The tractive force is 50 N.

Mounting
The Proximity Sensor must not be subjected to excessive shock with a hammer when it is installed, otherwise the Proximity Sensor may be damaged or lose its water-resistivity.
Do not tighten the nut with excessive force. A washer must be used with the nut.

Maintenance and Inspection
Periodically perform the following checks to ensure stable operation of the Proximity Sensor over a long period of time.
1. Check for mounting position, dislocation, looseness, or distortion of the Proximity Sensor and sensing objects.
2. Check for loose wiring and connections, improper contacts, and line breakage.
3. Check for attachment or accumulation of metal powder or dust.
4. Check for abnormal temperature conditions and other environmental conditions.
5. Check for proper lighting of indicators (for models with a set indicator.)
Never disassemble or repair the Sensor.

Environment
Water Resistivity
The Proximity Sensors are tested intensively on water resistance, but in order to ensure maximum performance and life expectancy avoid immersion in water and provide protection from rain or snow.

Operating Environment
Ensure storage and operation of the Proximity Sensor within the given specifications.

Inrush Current
A load that has a large inrush current (e.g., a lamp or motor) will damage the Proximity Sensor, in which case connect the load to the Proximity Sensor through a relay.

<SUITABILITY FOR USE>
OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of the products in the customer's application or use of the products.
Take all necessary steps to determine the suitability of the product for the systems, machines, and equipment with which it will be used.

<CHANGE IN SPECIFICATIONS>
Product specifications and accessories may be changed at any time based on improvements and other reasons. Consult with your OMRON representative at any time to confirm actual specifications of purchased product.

ALL DIMENSIONS SHOWN ARE IN MILLIMETERS.
To convert millimeters into inches, multiply by 0.03937. To convert grams into ounces, multiply by 0.03527.

Cat. No. D03E-EN-02A In the interest of product improvement, specifications are subject to change without notice.
